

Make a beaver mask!

Follow the instructions below to create your own beaver mask!

Instructions

Print

Print the mask on A4 paper. For best results use stock card.

Colour in

Colour in the mask using crayons, markers or paint. For those who like to follow a guide, below are some suggestions of what the mask might look like coloured in.

Cut out

Using scissors cut along the edge of the mask and cut out the eye holes.

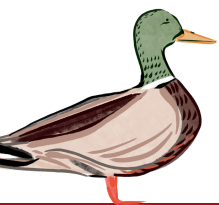

Attach string or a stick

Punch holes at either side of the mask, thread string through and then tie knots to secure it. Alternatively, tape or glue a stick to the bottom of mask on the back so it can be held.

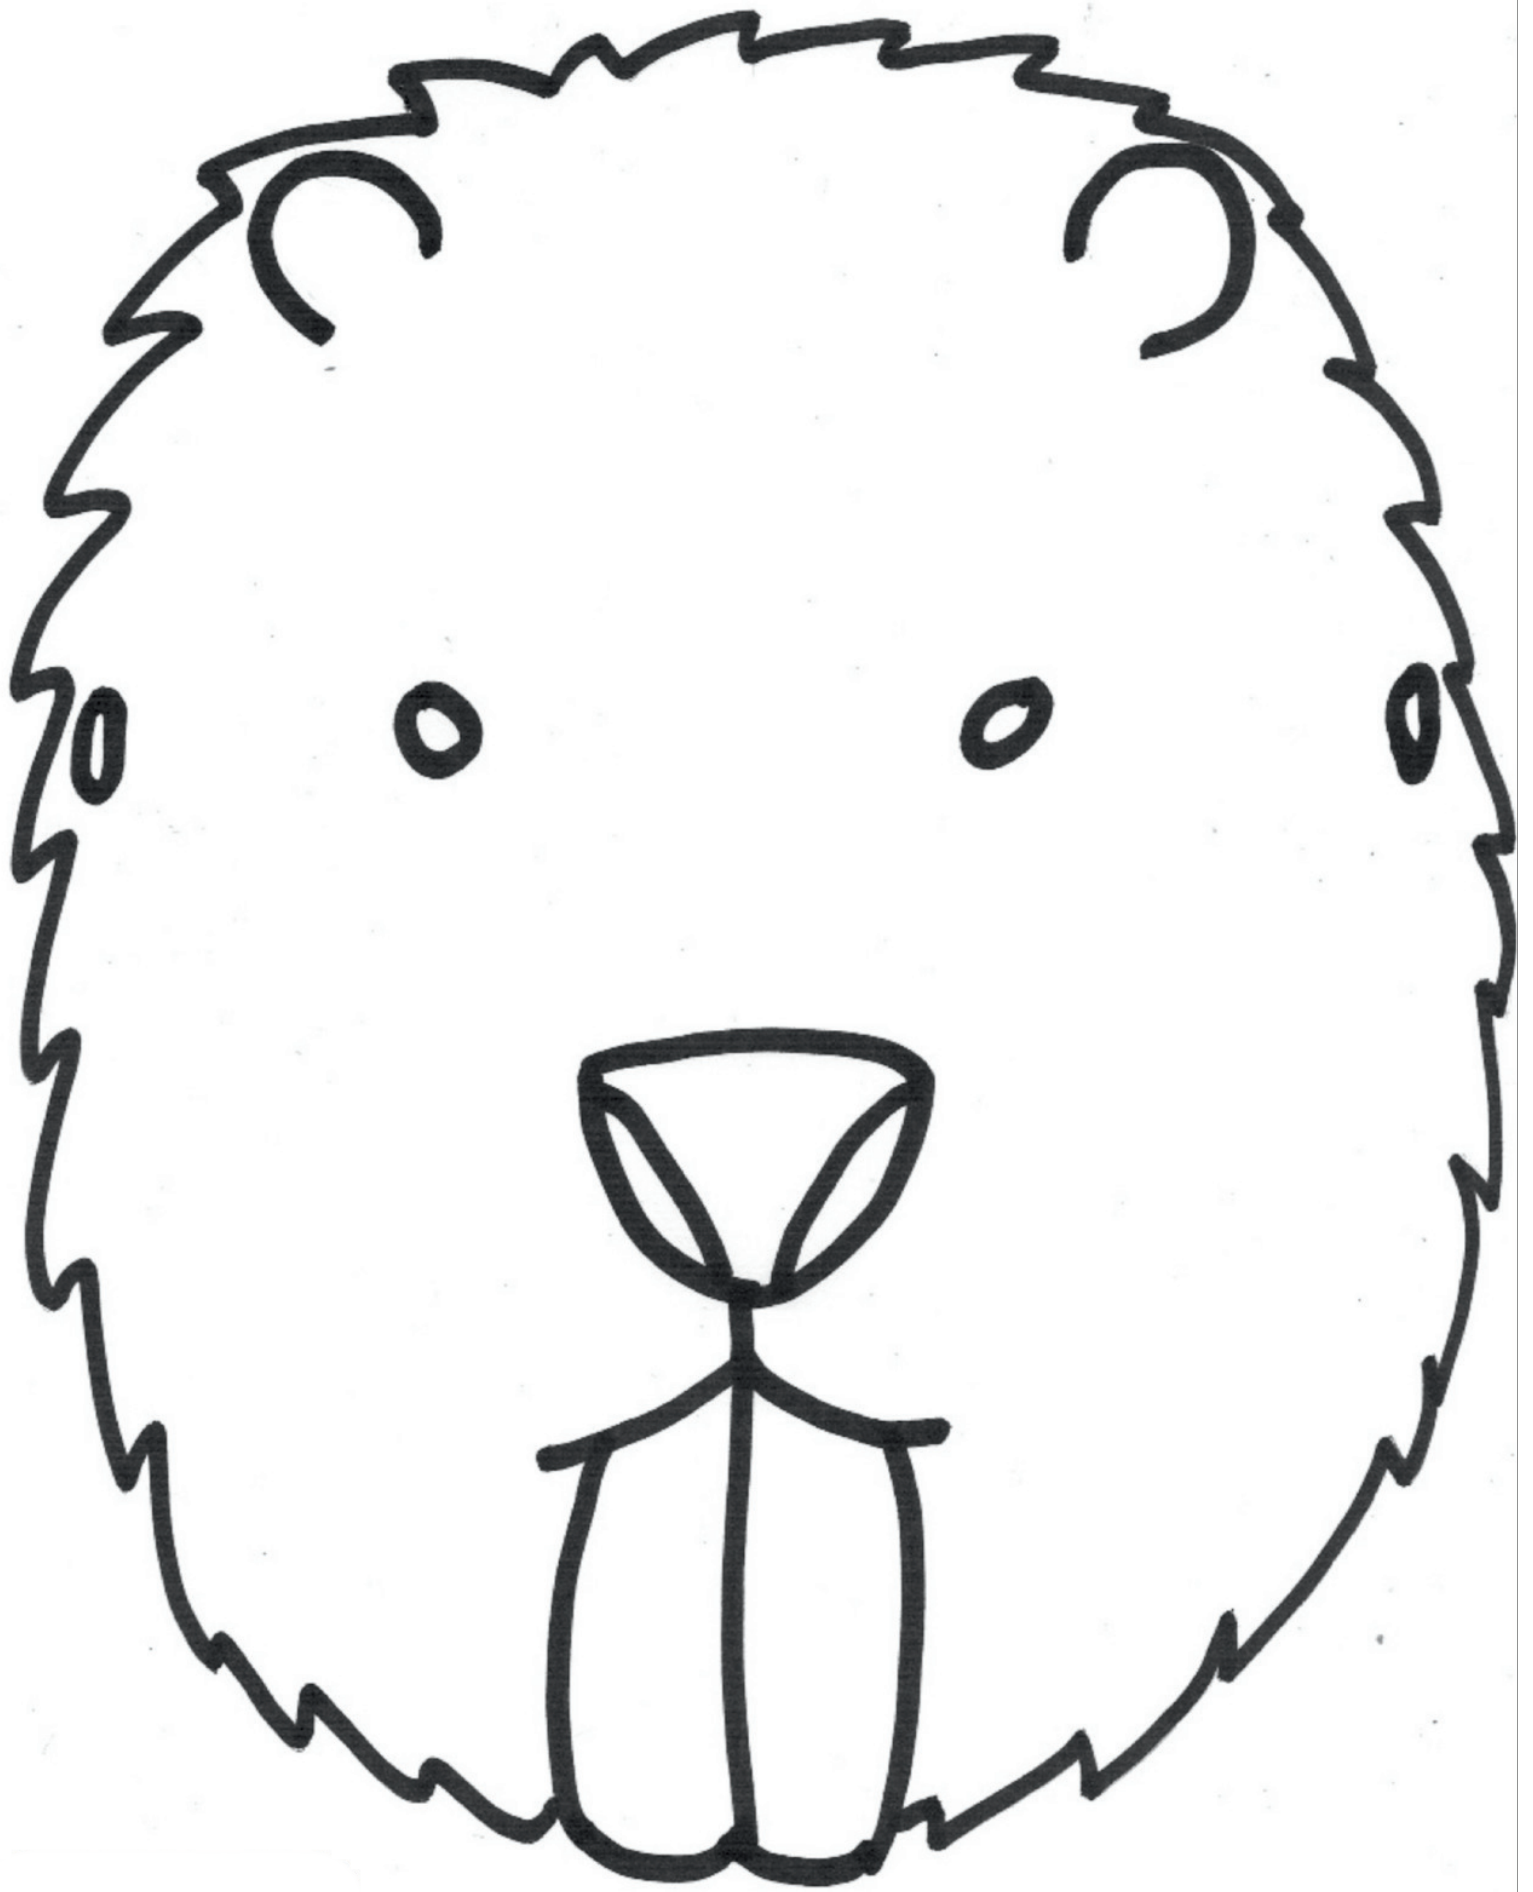

Have fun!

Have fun pretending to be a busy beaver building dams and felling trees!

Don't forget to send us a photo of your mask to info@beavertrust.org or upload it to social media and tag us @beavertrust to join our colony at the lodge.
